Environmental Policy

Principles

The protection of the environment, the safety and health of our employees, sub-contractors and any others affected by any area of our operations are integral parts of the Company business performance and are a management priority.

Policy

It is our policy to integrate the consideration of environmental impact into all our decision-making and consider ways in which we can conserve energy and minimise waste.

This policy is communicated to all persons working for or on behalf of the organisation.

Practices

We seek to reduce the impact of our activities on the environment in the following ways:

- Raising and maintaining a high level of understanding of, and participation in, environmental best practices by staff and suppliers.
- Avoiding unnecessary use of hazardous materials and products, and seek substitutions when feasible. Take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of accordingly.
- Minimising waste by evaluating operations and ensuring they are as efficient as possible. Ensure all waste is disposed of in line with legal and environmental requirements
- Actively promoting recycling, amongst employees, customers and suppliers. Utilising and promote the use of, recycled materials whenever possible, ensuring that materials are disposed of in an environmentally safe manner at the end of their useful life.
- Minimising toxic emissions wherever possible through the effective management of travel and modes of transport.
- Managing electricity, water and gas supplies to ensure minimum consumption through energy efficient initiatives. Making best use of natural light within our building and conserving energy by adopting an 'only turn on when using' approach to equipment.
- Sourcing and promoting products, supplies and equipment to minimise the environmental impact of production and distribution.
- Striving to continually improve our environmental performance and minimising the social impact and damage of activities by periodically reviewing our environmental policy in light of our current and planned future activities.
- Complying fully with relevant enforcement agencies and non-statutory bodies.
- Reviewing this policy on an annual basis.
